#	Locality /date	short description
1	Revúca/9 Feb 2025	Sustainable timber harvesting in private forests. A wheeled forestry tractor used for timber skidding demonstrates the practical and technological side of active forest management in challenging terrain.
2	Low Tatras/16 Oct 2024	Silviculture supporting forest biodiversity. Forest stands opened through thinning interventions create a more diverse forest structure and provide suitable habitat conditions for species such as the capercaillie.
3	Brezno/ 24 Mar 2025	Timber forwarding as part of active forest management. Appropriate forest machinery supports efficient timber extraction and demonstrates the economic dimension of sustainable forestry and local forest value chains.
4	Pol'ana mnt./11 Oct 2025	Restoring forests after disturbance. Reforestation of calamity-affected areas in difficult mountain terrain is an important step towards restoring forest cover and establishing resilient future forest stands.
5	Lučenec/8 Mar 2026	Professional forestry work in practice. Forest worker during tree felling, illustrating the importance of skilled forestry professionals and responsible harvesting in sustainable forest management.
6	Rimavská Sobota/2 Apr 2025	Forests provide much more than timber. Building and maintaining a forest spring highlights the importance of water, recreation and other ecosystem services provided by sustainably managed forests.
7	Low Tatras/30 Jul 2025	Caring for the multifunctional forest landscape. Maintenance of forest trails supports forest management, accessibility and recreation and illustrates the multiple benefits forests provide to society.
8	Banská Bystrica/14 Mar 2026	Learning directly in the forest. A field demonstration provides an opportunity to share practical forestry knowledge and discuss sustainable management under real forest conditions.
9	Zvolen/14 Oct 2025	Engaging the next generation in forest restoration. Young volunteers participate in establishing a new forest stand, connecting practical forest regeneration with community engagement and environmental awareness.
10	Žiar and Hronom/9 May 2026	Forest regeneration under professional guidance. Cooperation between forest professionals and participants helps ensure that new stands are established using appropriate forestry practices.
